Color palette

Use these values to maintain color consistency from digital to print applications.

The CMYK values are for printed materials. Both Pantone spot colors and CMYK percentages have been provided. Every print technique is different and print proofs may be required to ensure color accuracy.

The RGB values are for digital, on-screen materials. Both RGB values and HEX codes have been provided. Every display is different so there may be a slight variation across devices.

Color #1

#000000 Color Hex

RGB value is

0, 0, 0

CMYK process color value is

0, 0, 0, 100

Applications

The following elements were created to present to maintain the brand identity across printed material and online applications
